OperaVPN Analysis: how it is put together

sketched from the file

OperaVPN Analysis: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GK

Product map: what OperaVPN Analysis is for

WHAT IT IS

A small project in Markdown. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: README.md, Opera GX VPN Trustworthy?.pdf.

WHAT COMES OUT

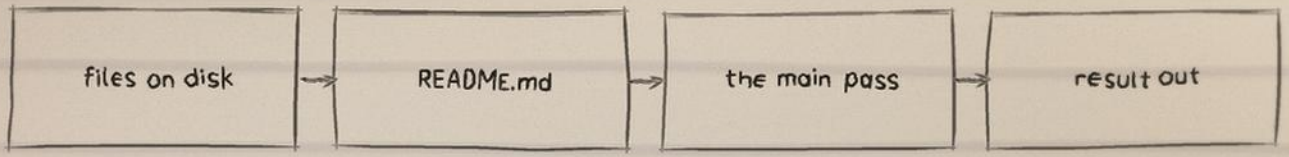

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

OperaVPN Analysis: data flow, in one direction

One direction. Anything the code does not do is not drawn.

Second sheet,

OperaVPN Analysis in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

2 files in the tree.

3 commits, first 2025-07-08, last 2025-07-08, from the local git log.

No test files by name in this snapshot.

counted and drawn, OK

OperaVPN Analysis: schematic of the apparatus

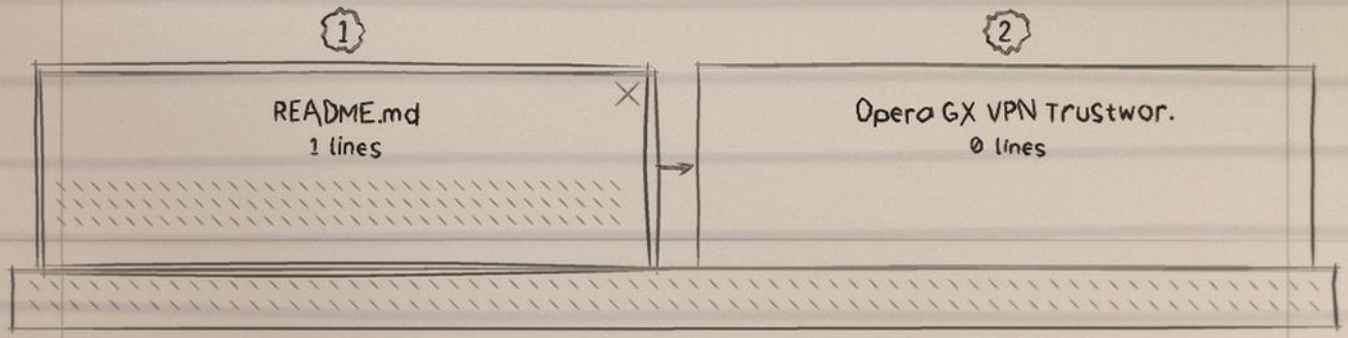

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. README.md
2. Opera GX VPN Trustw.

in flow order, first to last

base plate: the repo itself, sectioned

span: 2 files, 1 lines counted

turns of the crank so far: 3 commits, 2025-07-08 to 2025-07-08

measured and sketched, GK
